Ok, what they sent was a timely reply, but still not very helpful. I will spend some time reviewing and organizing, and I do agree with her that a call/meeting would be useful. We have some unfortunate past work we need to distance ourselves from, like the fact that we sent them a draft permit without having any idea where the proposed new wells were going.

I will keep you informed and go over the info before I schedule a meeting.

Okay, I'll ask Jim to scan and forward to you (of course, apparently scanning is not quite as seamless here on Floor 2....)

Subject: Alon

Hi Michele,

I received a response from Alon. It is thin – about 15 pages. Maps of well locations, and outdated information about the exemption status. I could have Jim scan and send to you if that would be useful. Thanks, David
